

RUHUMBIKA JOHN MTUMBA

Software Developer | Business Information Technology | AI & Digital Transformation
Dar es Salaam, Tanzania | +255 787 550 399 | ruhumbikamtumbajohn@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Bachelor of Science in Business Information Technology student at the University of Dar es Salaam with hands-on experience developing web, mobile and AI-enabled applications, designing databases, integrating REST APIs and supporting public-sector ICT operations. Experienced with Flutter, Laravel, Node.js, Python, MySQL and PostgreSQL, with strong capability in requirements analysis, Agile documentation, testing and troubleshooting. Entrepreneurial, adaptable and committed to building practical digital solutions that improve service delivery and user experience.

TECHNICAL SKILLS

Programming: Dart, PHP, JavaScript, Python, SQL, R, HTML5, CSS3

Frameworks & Platforms: Flutter, Laravel, Node.js, Express.js, FastAPI, Streamlit, Android Studio

Databases & Tools: MySQL, PostgreSQL, SQLite, SQL Server, Git, GitHub, Postman, Linux, VS Code, XAMPP, Figma

AI, Data & Cloud: LLM integration, Retrieval-Augmented Generation (RAG), Ollama, machine learning fundamentals, data analysis, dashboards, cloud deployment fundamentals

Professional Practices: REST API development, Agile/Scrum, system analysis, testing, technical documentation, troubleshooting, stakeholder communication

SELECTED PROJECTS

Kilindi Traders Digital License Management System (KDILMS)

Jan - Jul 2026

Final Year Project | Laravel, PHP, MySQL, NEXTSMS

- Developed a web-based licensing platform for Kilindi District Council to centralize trader records, licence renewals, debt monitoring, SMS reminders, reports and audit logs.
- Implemented role-based access control, TAUSI data import and validation, dashboards and reporting workflows for business officers, ICT administrators, auditors and management.
- Produced project documentation including requirements, user stories, backlog, acceptance criteria, WBS, risk analysis, testing and deployment plans.

Student Support LLM Platform

Jul 2026

Python, FastAPI, Streamlit, Ollama, RAG

- Built an AI-powered academic support assistant using a locally hosted language model, a FastAPI backend and a Streamlit chat interface.
- Implemented a Retrieval-Augmented Generation pipeline and document-upload workflow to ground responses in university-specific knowledge while preserving local, low-cost inference.
- Tested the complete request flow from frontend to backend to model, including API responses, logging, error handling and production-readiness considerations.

Rental Platform MVP

2025 - 2026

Flutter, Node.js, Express.js, PostgreSQL

- Designed and developed a mobile-first platform connecting tenants, landlords and administrators through role-based accounts, property listings, search filters, map discovery and availability controls.
- Modelled digital contracts, escrow-payment concepts, disputes and trust-and-safety workflows to improve rental transparency and reduce fraud.

Employee ID Card Generation Portal

2024

PHP, MySQL, QR Code, PDF Generation

- Created a secure portal for employee record management, authentication, QR-code verification, print tracking and downloadable PDF identity cards.
- Reduced manual preparation work and improved the consistency of digital records for public-sector ICT operations.

PRACTICAL EXPERIENCE

- Field Practical Training - ICT Unit, Kilindi District Council

Jul - Sep 2025

 - Installed and configured desktop and laptop computers, supported biometric-device setup, resolved printer and software issues and assisted staff with day-to-day technical support.
 - Supported ICT asset labelling, system setup, troubleshooting and digital records management in a local-government working environment.
- Field Practical Training - ICT Unit, Kilindi District Council

Jul - Sep 2024

 - Assisted with user support, basic network and device troubleshooting, database-related tasks, system testing and documentation.
 - Gained practical understanding of public-sector workflows, service delivery, reporting, data handling and professional ICT support.
- Founder / Operator - RJAY Digital Hub & RJAY Barbershop

2024 - Present

Dar es Salaam

 - Manage customer service, budgeting, staff coordination, branding, digital booking concepts, Wi-Fi voucher operations and continuous business-process improvement.
 - Apply technology and product thinking to improve customer experience, operational visibility and small-business growth.

EDUCATION

- Bachelor of Science in Business Information Technology

Oct 2023 - Jul 2026

University of Dar es Salaam, College of Information and Communication Technologies

 - Relevant study areas: software development, database systems, systems analysis and design, artificial intelligence, business intelligence, cybersecurity, IT audit and controls, project management and research methods.

TRAINING, LEADERSHIP & PROGRAMMES

- Nuru Yangu Scholarship Mentorship Programme

2026

 - Participated in structured personal development, leadership, confidence-building and career-planning activities.
- National Service Training - Jeshi la Kujenga Taifa, 822 KJ

Jun - Sep 2023

 - Completed training in discipline, teamwork, leadership, basic defence and security, and productive work; awarded Grade A for work performance and conduct.

ADDITIONAL INFORMATION

Languages: Swahili (Native), English (Fluent)
Strengths: Problem solving, analytical thinking, teamwork, leadership, adaptability, research, documentation, attention to detail and ability to work under pressure
