Professional profile

Software engineer developing web and mobile applications, enterprise integrations and business automation. Builds solutions that connect operational systems, streamline workflows and make business information easier to use. Bachelor of Science in Business Information Technology graduate with honours.

Technical capabilities

Development: PHP, JavaScript, TypeScript, Python, Dart, SQL, HTML and CSS. Laravel, Next.js, Node.js, Express.js, FastAPI, Flutter and Streamlit.

Systems and data: REST APIs, webhooks, authorization, PostgreSQL, MySQL, SQLite, Docker, Linux and Git.

Quality and delivery: Postman, functional and regression testing, integration validation, UAT support, deployment troubleshooting and technical documentation.

Professional experience

Full stack developer

Ma Cargo Transporters and Forwarders, ABOOD Group of Companies
August 2026 to present

- Develop and support enterprise applications, APIs and operational workflows.
- Contribute to property management ERP functionality, approval workflows and attendance integration.

ICT field practical training

Kilindi District Council
July to November 2024 and July to November 2025

- Provided user support, software installation and computer and printer configuration.
- Assisted with biometric devices and routine network troubleshooting.

Selected engineering work

WhatsApp approval gateway

Developed a solution for ERP approvals through WhatsApp, connecting approver identity, interactive decisions, ERP callbacks and audit records in one workflow.

Attendance integration

Built an integration connecting biometric attendance records to HRM workflows, with transaction filtering, device identification, queues and batch processing.

ABOOD Media radio advertising integration

Developing a studio integration for the ABOOD Media system, whose goal is to track radio advertising sales. Connects ERP schedules to RadioBOSS playback and advertisement insertion.

Kilindi traders digital licence management system

Developed a centralised solution for trader licensing, renewals, debt monitoring, SMS reminders and reporting, with permissions and audit records for administrative accountability.

Student support AI assistant

Developed a locally hosted academic support solution using FastAPI, Ollama and FAQ retrieval to deliver answers grounded in university information.

Education

Bachelor of Science in Business Information Technology
University of Dar es Salaam, 2023 to 2026. Graduated with honours.

Advanced Certificate of Secondary Education
Bunda High School, EGM, Division I, 2021 to 2023.

Certificate of Secondary Education
Iligamba Secondary School, Division I, 2020.

Business and professional development

Founder and operator of RJAY Digital Hub and RJAY Barbershop, supporting customer operations and digital branding.

NMB Nuru Yangu Scholarship Mentorship Programme, 2026. National Service Training, JKT 822 KJ, 2023.
