PROFESSIONAL PROFILE

Software Engineer and Bachelor of Science in Business Information Technology graduate with hands-on experience in full-stack web and mobile applications, enterprise ERP integrations, API-driven automation, and AI-enabled products. Work spans enterprise operations platforms, WhatsApp approval workflows, biometric attendance integration, and radio studio gateway testing. Focused on dependable engineering, systems integration, technical delivery, and strategic technology partnerships.

ENGINEERING CAPABILITIES

Software: PHP, JavaScript, TypeScript, Python, Dart, SQL, HTML/CSS; Laravel, Next.js, FastAPI, Node.js, Express.js, Flutter, Streamlit.

Systems & integration: REST APIs, webhooks, WhatsApp Cloud API workflows, authorization, PostgreSQL, MySQL, SQLite, Docker, Linux, Git/GitHub.

Quality & delivery: Postman API validation, functional and regression testing, UAT support, audit logging, deployment troubleshooting, data validation, documentation, security-conscious application design.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Ma Cargo Transporters and Forwarders (ABOOD Group of Companies)

2026 – Present | Technology / Software Development

- Build and support frontend/backend application functionality, enterprise APIs, operational workflows and production troubleshooting.
- Contribute to the PETA Holdings ERP platform, supporting property, leases, revenue and operational monitoring.
- Develop and test integrations involving approval workflows, attendance data and business systems.

ICT Field Practical Training — Kilindi District Council

July–November 2024 and July–November 2025 | ICT Unit

- Provided software installation, technical support, biometric device assistance, troubleshooting and records support.
- Supported user issues, computer and printer configuration, equipment labelling and routine network/device operations.

SELECTED ENGINEERING WORK

WhatsApp Approval Gateway — ERP Decision Workflows

2026 | Integration Developer | Webhooks, authorization, REST APIs

- Designed and tested ERP approval request flows with WhatsApp interactive decisions, identity binding, callbacks and audit records.
- Validated integration contracts and background delivery behavior in testing; broader rollout is a separate milestone.

Attendance Integration — EasyTimePro / ZKTeco to GHRM

2026 | Integration Developer | Docker, PostgreSQL, REST API

- Built and tested attendance data forwarding with transaction filtering, device serial handling, queuing and batching.
- Worked on synchronization and troubleshooting; operational reconciliation and deduplication require continuing checks.

ABOOD Radio Studio Gateway — RadioBOSS

2026 | Software Integration Developer | Python, RadioBOSS API

- Tested playback control, track insertion and scheduling-related safeguards via a Windows studio gateway.
- Full ERP scheduling integration remains ongoing.

Kilindi Traders Digital License Management System

2025–2026 | Full-Stack Developer | Laravel, PHP, MySQL

- Built role-based trader licensing workflows, renewal processes, debt monitoring, SMS reminders, reporting and audit logs.
- Validated imports, permissions, calculations and workflows; supported deployment and configuration troubleshooting.

Student Support LLM Platform

2026 | Academic Project | FastAPI, Ollama, RAG

- Developed a locally hosted academic assistant with FAQ retrieval, REST integration and testing of grounded responses.

RJAY Barbershop Digital Platform & Rental Marketplace

2025–2026 | Product Development | Web and mobile

- Worked on booking/service operations and mobile-first property discovery features, integrating product and business requirements.

EDUCATION

Bachelor of Science in Business Information Technology — University of Dar es Salaam, College of Information and Communication Technologies (2023–2026). **Second Class Lower.**

Advanced Certificate of Secondary Education — Bunda High School, EGM, Division I (2021–2023).

Certificate of Secondary Education — Iligamba Secondary School, Division I (2020).

TRAINING AND PROFESSIONAL DEVELOPMENT

NMB Nuru Yangu Scholarship Mentorship Programme (2026): Leadership, self-awareness and professional development.

National Service Training, JKT 822 KJ (2023): Discipline, teamwork and productive-work training; Grade A for work competence and conduct.

ENTREPRENEURSHIP

Founder & Operator, RJAY Digital Hub and RJAY Barbershop: Customer operations, branding, service workflows and technology adoption.
